

PON SANKARA NAVEEN R K

Ambitious QA Automation Engineer with 5+ years of experience in QEA Test Automation, skilled in test planning, automation framework design, and executing both manual and automated test scripts. Passionate about crafting innovative solutions, focused on evolving into an SDET while continuously adapting to new technologies. Dedicated to delivering exceptional quality through the optimization of test efficiency and the advancement of automation excellence.

PROJECTS AND EXPERIENCE

➤ FISERV, INC. | JUN 2025 – PRESENT

Automation Engineer – Merchant Solutions - Certification

- **Front-End Log Validation Automation:** Rapidly on boarded into Cards & Payments transaction flows and system architecture; contributed to **Front-end log validation automation** using Selenium, Java, Cucumber, and JUnit.
- **Commerce Hub Regression Automation:** Strengthened regression coverage for Commerce Hub (E-commerce Payment Platform) by enhancing and maintaining JMeter automation scripts for stable payment flow validation.
- **CR BO Automation:** Automated critical back-office workflows for Mainframe systems by co-developing a standalone solution using Python, Django, BlueZone, Celery, and RabbitMQ, improving process efficiency on every Change Release.
- **Front-End Log Viewer (Innovation):** Conceptualized and built a log viewer to segregate and visualize archived test logs/traces from client tools using corresponding RRN, significantly accelerating validation and minimizing daily manual testing effort.

➤ COGNIZANT TECHNOLOGY SOLUTIONS | DEC 2020 – JUN 2025

Automation Engineer – HC CSR Application

- Created, Engineered and Executed **automated test scripts (Selenium + Java)** for web application in regular basis ensuring that the application remained defect free.
- Leveraging my expertise in QA automation, I seamlessly navigate the scrum team landscape, taking responsibility for **system, regression, end-to-end, WCAG, and API testing both manually and via automation.**
- Developed **integrated test scripts** to carryout entire End To End testing by combining presentation layer test scripts with backend testing tools.
- Collaborated effectively with cross-functional teams (Dev, PO, BA, Scrum, Backend, Infra, DB) to ensure accurate and complete requirement fulfillment.
- **Innovative Solutions & Award-Winning Contributions in QEA Accelerators (2024-2025):**
 - ✓ **Innovative Champ Award - Unified Test Data Management Tool:** Engineered an automated solution that reduced data request efforts by 80%, saving over 400+ hours annually across teams.
 - ✓ **Enhancing Reliability via IVR-to-Web Automation:** Recognized for leading the implementation of IVR-to-Web App end-to-end automation initiative, enhancing test coverage and system reliability.
 - ✓ **Client-Facing SharePoint Dashboard:** Collaborated with senior leadership to design and launch a SharePoint site showcasing QA metrics, reinforcing delivery transparency and client trust.
 - ✓ **Service Request Validation Tool:** Honored by the client for swiftly developing a VBA-based macro tool to address a PROD incidents, saving 48 hours of testing effort per release and prevented up to 28 potential production defects.

Test Analyst – Cloud Migration Project.

- Successfully validated the migration of Provider & Payer web applications from on-prem to Azure through functional and integration testing.
- Azure Fundamentals (AZ-900) certified; proactively identified and resolved cloud-specific issues (WAF, FTP stability, timestamps, security) to ensure on-time signoff.
- Developed **VBA automation tools** for data setup and routine tasks, including VPN/VM login, application access, and screenshot capture.
- Awarded **Rising Star – Silver** for exceptional performance and innovative automation solutions that improved team efficiency and productivity.
- Developed Selenium-VBA smoke test automation scripts to validate web applications after Azure patch deployments, significantly reducing manual effort and time.
